## Oakland/East Bay Teachers Circle - Pick's Theorem

March 2008

In this session, we will compute the area of a polygon by counting grid points. For the polygons on the following pages, keep track of the following data:

| Area | Number of interior grid points | Number of boundary grid points |
| :--- | :--- | :--- |
|  |  |  |

 - • • • • • • • • • • • • • • •

 - • • • • • • • • • • • • • •
